PRICE LIST.

Cables & Telegrams :

"Clabrough, Birmingham."

Introduction.

THIS list is devoted to a range of Clabrough guns, suitable either for pigeon or game use.

Our general **Wholesale list** "C," which embraces Guns and Rifles of all descriptions, and is set up in no less than four languages, thereby providing for universal requirements, may be had upon application.

As manufacturers of guns and rifles for a period of half-a-century, we have many evidences of the appreciation won by the Clabrough gun.

We would like to recapitulate the following :—

Manufacture—All our guns are made from the finest English wrought materials, and fashioned by skilled workmen in every stage under most careful supervision. Every weapon bears the English regulation proof marks.

Boring and Choking is done on most modern principles, and for close and hard shooting, and special attention is given to regularity of pattern in cylinder bores, shooting tests being made on our factory range.

With the exception of the plainer guns, all makes are supplied in 12, 16 or 20 bore at the same price.

Steel barrels.—Every year brings fresh proof that steel barrels will supersede all others. The proof-house tests have placed it beyond doubt that good steel barrels have greater resisting power and tensile strength than any other class. We use the finest steel only, and we strongly recommend their use where not already adopted. Any predilection however for Damascus barrels we shall be pleased to satisfy where the gun specification provides for it.

Guns in stock.—All the guns described herein will be found in our representatives' store, as shipments to make good stock sales, are constantly being made.

Guns to order.—Any gun can be made to special order without extra charge, and such orders will be executed with the utmost dispatch. Stock measurement form will be found for customer's use at end of list.
